Journal of Testing and Evaluation
Table of Contents
Volume 22, 1994

No. 1, January

On the Uncertainties Involved in Quantifying the Fracture Toughness of Al-Li-X Alloys—PETER C. MCKEIGHAN AND BEN M. HILLBERRY 3

Dynamic Fracture Toughness Measurements on Small Charpy Specimens—A Preliminary Study—W. N. SHARPE, JR. AND W. BÖHME 14

R-Curve Generation and CTOD Evaluation Considering Maximum Crack Growth Size and Parabolic Crack Front—SOVA BHATTACHARYA AND A. N. KUMAR 20

Crack Length and *J*-Integral Expressions for Specimens Loaded in Tension—BERNARD FAUCHER 30

Controlling, Data Acquisition, and Data Processing for Axial and Shear Creep Tests Using a Computer—FREDERICK C. SCHMITT AND JAMES M. MATTHEWS 36

Study of Steel Weldments Using Electronic Speckle Pattern Interferometry—J. SIVAGANTHAN, A. R. GANESAN, B. C. TAN, K. S. LOW, AND R. S. SIROHI 42

A Computer Method of Analysis for Tire Wear Characterization, Identification, and Classification—KOOROSH CHANGIZI 45

Physiologic Challenges Induced by Participation in Ice Hockey—Implications for Training—H. J. GREEN 48

Workshop on Accuracy of Load and Strain Measurement of Testing Machines Introduction—A. PERLOV 52

Practical Aspects of Dynamic Verification of Extensometers: Part I—The Concepts—F. JOSEPH ALBRIGHT AND JAY ANNALA 53

Practical Aspects of Dynamic Verification of Extensometers: Part II—Actual Examples—F. JOSEPH ALBRIGHT AND JAY ANNALA 57

Data Acquisition and Analysis of Tensile Properties for Metal Matrix Composites—B. ROEBUCK, J. D. LORD, P. M. COOPER, AND L. N. MCCARTNEY 63

Measurement Uncertainty Analysis of a Transfer Standard Force Calibration System—F. MICHAEL TOVEY 70

Technical Note: A New Restraint for High-Load-Transfer Fastener Fatigue Test—ZHU YIGANG, WU XUEREN, AND YANG YONGAN 81

No. 2, March

Fatigue Crack Propagation in a Specimen with a Complicated Cross-Section; Characterization of the Stress Intensity Factor—CHOBIN MAKABE, HIDEO KANESHIRO, AND HIDEO YARA 91

The Use of Fatigue Specimens Precracked in Compression for Measuring Threshold Values and Crack Growth—REINHARD PIPPAN, LAURENZ PLÖCHL, FRANZ KLANNER, AND HEIN PETER STÜWE 98

Development of an Improved Compression Specimen Geometry for Unreinforced Polymers—EDWIN M. ODOM AND DONALD F. ADAMS 104

Numerical Model of Primary Creep Deformation in a Novel Double Shear Specimen—N. L. JOHNSON AND J. C. EARTHMAN 111

Back-Face Strain Compliance and Electrical-Potential Crack Length Calibrations for the Disk-Shaped Compact-Tension DC(T) Specimen—C. J. GILBERT, J. M. MCNANEY, R. H. DAUSKARDT, AND R. O. RITCHIE 117

Application of Surface Fabrication to Strain Measurement in Nanometer Scale with the Scanning Tunneling Microscope—KENSUKE MIYAHARA, SABURO MATSUOKA, NUBUO NAGASHIMA, AND HIROYUKI MASUDA 121

Constant Temperature-Compensated Strain Rate Testing of Aluminum—V. M. SAMPLE AND D. P. FIELD 127

Local Strain in Corrugated Pipe: Experimental Measurements to Test a Numerical Model—IAN D. MOORE 132

Determining Asphalt Concrete Properties via the Impact Resonant Method—STEVEN L. WHITMOYER AND Y. RICHARD KIM 139

Thermal and Mechanical Properties of Cellular Polystyrene and Polyurethane Insulation Materials Aged on a Flat Roof in Hot-Dry Climate—ERTAN OZKAN 149

Testing Techniques for Measurement of Bulk Modulus—K. L. FISHMAN AND D. MACHMER 161

Development and Validation of a Standard Test Method for Sequential Batch Extraction of Waste with Acidic Extraction Fluid—SUSAN S. SORINI 168

Effect of Composition of El-lajjun Oil Shale on Its Calorific Value—MOHAMMED Z. ANABTAWI AND JAMAL M. NAZZAL 175

No. 3, May

Prediction of Fatigue Life of Plain Concrete Beams from Fracture Tests—D. V. RAMSAMOOJ 183
Behavior of Asphalt Concrete Mixtures in Triaxial Compression—TAN SIEW-ANN, LOW BOON-HWEE, AND FWA TIEN-FANG 195
Evaluation of Machinability Data—LAI-ZHE JIN AND ROLF SANDSTRÖM 204
Relevant Errors Associated with Tension Testing of Metals—LUCA TOMESANI 212
Stress Correction for Removal of Material in X-Ray Stress Determination—Z. Q. KANG, J. B. LI, AND Z. G. WANG 217
Preparation of Stainless Steel Adherends for Adhesive Bonding—GEORGETTE B. GASKIN, GABRIEL J. PILLA, AND STANLEY R. BROWN 222
Uniaxial Tensile Strength of Cementitious Composites—H. A. TOUTANJI AND T. EL-KORCHI 226
Temperature Dependencies of Elasticity Characteristics for Tellurium-Alloyed Gallium Arsenide—A. I. TROYANSKII AND V. A. BORISENKO 233
Technical Notes from the Sixth International Civil Aviation Security Conference (AVSEC'93) Introduction—LYLE O. MALOTKY 235
Enforcement of International Regulations—LYNNE A. OSMUS 238
Regulation: Perception and Reality—DOUGLAS R. LAIRD 240
Australian System for Aviation Security Identification Cards and Associated Personnel Background Checking—RAY TURNER 243
Reconciling Passenger Facilitation and Security—TREVOR J. C. JOY 245
Security Technologies and Techniques: Airport Security Systems—J.-F. BOUISSET 247
Standardized Training through the Use of the ICAO Standardized Training Packages (STPs)—R. G. SUTHERLAND 251
IATA and Its Cooperative Role in Aviation Security—BRIAN WALL 257
The Role/Responsibility of the Freight Forwarder—ANDERS KOCH 259
The Need to Harmonize Cargo Security Rules—DAVID FORBES 265
International Aviation Security Research and Development—PAUL A. POLSKI 267
Aviation Security Standards Development within ASTM Committee F-12 on Security Systems and Equipment—PETER M. DRAGHETTI 275
Reaching Consensus on Technical Standards through ICAO: The Work of Ad Hoc Group of Specialists on the Detection of Explosives—NICK CARTWRIGHT 277
Development of Trace Explosive Detection Standards—LORNE ELIAS 280
Selection and Use of Explosives Detection Devices to Check Hand-Held Luggage—SVEN HNATNICKY 282

No. 4, July

Determining the Potential Drop Calibration of a Fatigue Crack Growth Specimen Subject to Limited Experimental Observations—PETER C. MCKEIGHAN AND DAVID J. SMITH 291
A Fractographic Technique for the Estimation of Initiation Fracture Toughness J_{Ic} for Ductile Materials—M. SRINIVAS, S. V. KAMAT, AND P. RAMA RAO 302
Deducing Crack History in an Aged Boiler Tube from Fracture Surface Topography—TAKAO KOBAYASHI, DONALD A. SHOCKEY, GABRIEL OGUNDELE, DAVID D. MCNABB, AND DUNCAN SIDEY 309
Instructions for a New Method of Inclusion Rating and Correlations with the Fatigue Limit—Y. MURAKAMI, T. TORIYAMA, AND E. M. COUDERT 318
A Suggested Test Procedure to Measure Mixed Mode I–III Fracture Toughness of Brittle Materials—ARUN M. KUMAR, JOHN P. HIRTH, RICHARD HOAGLAND, AND XIAOXIN FENG 327
Numerical Assessment of the Dynamic Tension Test Using the Split Hopkinson Bar—J. RODRÍGUEZ, C. NAVARRO, AND V. SÁNCHEZ-GÁLVEZ 335
Radial Basis Function Network Learns Ceramic Processing and Predicts Related Strength and Density—KRZYSZTOF J. CIOS, GEORGE Y. BAAKLINI, ALEX VARY, AND ROBERT E. TJIA 343
Bond Tests of Fiberglass-Reinforced Plastic Bars in Concrete—J. LARRALDE, R. SILVA-RODRIGUEZ, J. BURDETTE, AND B. HARRIS 351
The Influence of Test Piece Preparation on the Compressive Strength of Unidirectional Fiber-Reinforced Plastic—J. G. HÄBERLE AND F. L. MATTHEWS 360
Estimation of Young's Modulus and of Hardness by Ultra-Low Load Hardness Tests with a Vickers Indenter—A. C. TRINDADE, A. CAVALEIRO, AND J. V. FERNANDES 365
An Excitation System for Dynamic Testing of Large Structures—O. S. SALAWU AND C. WILLIAMS 370
Modeling Wood in Transverse Compression—PATRICK J. PELLICANE, JOZSEF BODIG, AND ALEX L. MREMA 376
Behavior of Wood in Transverse Compression—PATRICK J. PELLICANE, JOZSEF BODIG, AND ALEX L. MREMA 383
Objective Evaluation of Surface Characteristics to Determine Smoothness of Pile Fabrics—JOSEPH O. AJAYI 388

No. 5, September

Effects of Load-Distributed Width on Split Tension of Unnotched and Notched Cylindrical Specimens—T. TANG 401
Fatigue Testing of High-Density Polyethylene and Polycarbonate with Crack Length Measurement Using Image Processing Techniques—A. C. RIEMSLAG 410
The Influence of Testing Methodology on the Fatigue Crack Propagation Behavior of Cellulose Esters—THOMAS J. PECORINI AND ERIC J. MOSKALA 420
An Evaluation of Several Techniques for Measuring Air-Void Content in Asphalt Concrete Specimens—JOHN HARVEY, THOMAS MILLS, CLARK SCHEFFY, JORGE SOUSA, AND CARL L. MONISMITH 424
Data Analysis Techniques for Impact Tests of Composite Materials—ALRIK L. SVENSON, MARTIN W. HARGRAVE, LAWRENCE C. BANK, AND BINSHAN S. YE 431
A Differential Air Deflation Quality Assurance Test for Surgical Gloves—RONALD F. CAREY 440
Effects of Sample and Test Variables on Electrical Wire Insulation Flammability—E. M. RODAK, RONALD J. TAYLOR, DAVID B. HIRSCH, AND LARRY J. LINLEY 447
Effect of Overload Cycles on Thin Steel Roof Claddings during Cyclonic Winds—M. MAHENDRAN 451
Mechanical Study of a Hypoeutectoid Steel Weld—J. A. MARTÍNEZ, H. P. KUGLER, S. MERINO, H. DRUDE, AND A. J. CRIADO 458
Comparative Studies of Yarn and Fabric Friction—JOSEPH O. AJAYI AND H. M. ELDER 463
Symposium on Case Studies of Wear-Related Failure Analyses Introduction—FLOYD W. WOOD 468
On the Role and Analysis of Wear in Failures—F. W. WOOD 470
Wear Analysis of Björk Shiley Delrin Tilting Disc Heart Valves—HERBERT L. MILLIGAN, BRETT M. JOHNSON, AND PETER A. ENGEL 474
Scoring of Precision Spur Gears—KENNETH G. BUDINSKI 485
Wear-Related Fatigue in a Wire Rope Failure—KAROL K. SCHREMS 490

No. 6, November

Inconsistencies between CTOD and *J* Calculations—CHRISTOPHER D. WILSON AND JOHN D. LANDES 505
Back Face Strain Calibration for Crack Length Measurements—W. J. D. SHAW AND W. ZHAO 512
Charpy Transition Studies of an Embrittled AISI 8640 Lower Bainitic Steel—JAMES V. RINNOVATORE, KARL F. LUKENS, JAMES REINHOLD, AND WILLIAM MAHON 517
Numerical Analysis of Plasticity Effects in the Hole-Drilling Residual Stress Measurement—M. BEGHINI, L. BERTINI, AND P. RAFFAELLI 522
Determination of Softening Kinetics in a Material by Measuring the Evolution of Hot Flow Stress—D. P. FIELD, V. M. SAMPLE, AND R. S. RADER 530
Electrochemical Impedance Spectroscopy for Monitoring Coating Performance in Condensing Environments—HARVEY S. ROSENBERG AND BARRY C. SYRETT 537
Proposed Test Method for Dynamic Properties of Connections Assembled with Mechanical Fasteners—J. D. DOLAN 542
An Analysis of Creep and Shrinkage in Mortars—LAUREN B. SICKELS TAVES 548
Comparison of Asphalt Contents Measured with the Nuclear Gage and Extraction Methods—FRAZIER PARKER, JR. AND YIPING WU 556
Solvent-Free, Nuclear-Free Determination of Asphalt Content and Gradation of Hot-Mix Asphalt Concrete—H. A. TODRES AND S. BHATTACHARJA 564
Temperature Dependence of Dynamic Young's Modulus and Mechanical Damping in a Nextel Fiber-Reinforced Glass Composite—A. WOLFENDEN, J. E. GILL, K. K. CHAWLA, R. U. VAIDYA, AND R. VENKATESH 571
Effect of High Strain Rate on the Properties of PVC Pipe—N. M. S. AL-BASTAKI 574
Comparison of Selected Properties of Barrier Textile Material Used in Durable, Moisture Repellent Protective Clothing—B. LEWIS SLATEN, LISA A. SHANLEY, AND TERESA BELLINGER 577
Technical Note: The Determination of Single Edge-Notched Bend Specimen Load Line Displacement from Remotely Located Sensors in Elastic-Plastic Fracture Testing—K. J. KARISALLEN AND J. R. MATTHEWS 581
